numeric on the left side

Left-handed Keyboard

Ergonomic: numeric on the left side, results in more space for using the mouse on the right side

Better balanced: equally balanced of left and right arm

Handy: frequently used keys as PageUp, PageDown, Home, End and the arrow keys are both on left as on the right side of the keyboard

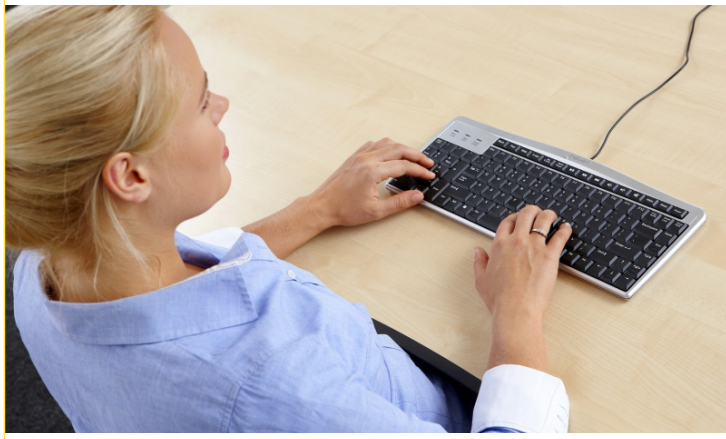
Thin: only 12.5 mm thickness on all sides

Specifications

Dimensions:	390 x 13 x 160 mm (W x D x H)
Weight:	700 g
Product code:	BNEEVK

Research

Compact keyboard (keyboards without separate numeric keys at the right side) decrease the reach distance to the mouse (Cook, et al, 1998), decrease the strain on the forearms and are found to be more comfortable than standard keyboards (van Lingen, et al, 2003).



1

1. Numeric part left

2. More place for mouse right

2

Health & Safety Regulations

The distance between the keys should be between 18 and 20 mm (ISO 9241).The alphanumeric keys of the keyboard have to be separate from the function keys (ISO 9241).Dark keys on a light color background make reading easier and increase productivity (Snyder, 1990).The middle row of the keys may not be higher than 30 mm, measured from the desk (DIN 2137). The keyboard should have the ability to tilt and be separate from the screen so as to allow the worker to find a comfortable working position avoiding fatigue in the arms or hands. (Council Directive 90/270/EEC).
